DirX Access Overview

Introduction to DirX Access

DirX Access is a comprehensive, cloud-ready, scalable, and highly available access management solution providing policy-based authentication, authorization and federation for Web applications and services. DirX Access delivers single sign-on, versatile authentication, identity federation based on SAML, OAuth and OpenID Connect, just-in-time provisioning, entitlement management and policy enforcement for applications and services in the cloud or on-premise.

This course provides an overview of the technology foundation, the features and architecture of DirX Access.
