
DirX Consulting

Introduction to IAM Project Implementation

Implementation of identity and access management projects bears challenges beyond the required product-specific technical skills and which apply similarly to all projects. This course addresses the overall topics for designing and planning of identity and access management projects, focuses on the specific challenges and gives useful practical advice, in order to successfully fulfill customer requirements.

To complement this training course, it is recommended to attend the DirX Identity Project Workshop.

Content

- Presentation
- Initial-Workshop
- Cost Estimation
- Functional and non-functional specification
- Design specification
